

ALLISON RACING

Allison Racing is a privateer motorcycle racing team achieving growing success in Supersport 600 - the premier class for our current bike. We have the ambition and skill to go further, and are seeking new sponsors and partners to work with in order to remain successful at the highest level.

We believe in a collaborative approach to sponsorship and work with our sponsors to deliver real value to your business. We work to cement that by supporting you to build links with each other, so that you get the most from your generosity. We appreciate you taking the time to consider what we can offer you, and look forward to discussing your company's involvement.

JOIN THE SUPPORT CREW

At Allison Racing, we are interested in forming great relationships with our partners, not receiving handouts. We believe that we can not only help one another, but create networks where our partners can help each other to grow their businesses together.

What Allison Racing can offer you:

- » Placement of your company's logo on the bike and sponsor's banner. Ask us about becoming our premier sponsor and obtain naming and colour scheme rights to the bike!
- » Opportunity to have the bike displayed at your workplace or event of your choice
- » Acknowledgement on team webpage and facebook page, includes a hyperlink to your webpage
- » Invitation to club race events
- » Subscription and acknowledgements in post-race reports
- » A framed picture of the bike in action
- » Can't find what you are looking for here? Contact us today about how we can tailor a package to suit your needs

RIDER PROFILE

PETER ALLISON

I am currently studying towards a PhD in mechanical engineering at the University of Canterbury, and I love to race motorcycles.

I have spent over a decade at the top of New Zealand rock climbing, and have recently turned my attention to motorcycle road racing. I have enjoyed making significant improvements to my riding ability in a short space of time, which I attribute to a highly analytical approach, developed through years of climbing and engineering studies.
